

Dear brave Lenca people,

We got to know about your issue in our school and it touched our hearts. We are indignant by the way how authorities are behaving towards your nation. Everyone is talking about Holocaust, but no one is talking about killing Indigenous people in America.

We admire your culture and the way you risk your lives for your land. Worldwide people are destroying nature and there should be more people like you. You are an inspiration for many many people. We hope that in the world will be more people who care about problems of others. We should help each other more. We believe authorities and developers will find out that you are not doing bad thing and they will support you.

Power makes people blind and we are grateful to you. We are sending to you our energy and we hope that you will make all of your goals come true. We believe that people will find the way how to live with each other in peace. We believe there is still justice in this spoiled society. Keep on fighting for good things and never give up. We will light up a candle for you and its light will symbolize our faith for better days and brighter future.

Yours faithfully,

Kristína, Michaela, Eva, Róbert and Rudolf

Students from Slovakia.
